

## **CV of Prof. Jingze Li**

Jingze Li is a professor in State Key Laboratory of Electronic Film and Integrated Device, School of Microelectronic and Solid-state Electronic, University of Electronic Science and Technology of China (UESTC).

He received his Ph.D. degree in Condensed State Physics at Institute of Physics, Chinese Academy of Science in 2000 with Professor

Liquan Chen. From 2000 to 2003, he was a postdoctoral fellow in Department of Chemistry, Osaka University. He moved to Department of Electronic Science and Engineering, Kyoto University in 2003 as a researcher associate. He was a research scientist from 2003 to 2007 in Chemical Resources Laboratory, Tokyo Institute of technology, entitled as JST researcher and JSPS researcher, separately. Since 2007 he has been appointed as a full-time professor in UESTC, his research interests are in the field of renewable energy covering lithium ion battery, and active in the nanostructured material for energy conversion and storage devices by block copolymer templating.
